

Connell, James Cameron

Dean, Medical Faculty, Queen's University

Oct, Nov 1915

October 23rd, 1915

Dean Connell,

Queen's University,

Kingston.

My dear Dean Connell:

This morning the University appeared before the Commission. I am sending you a copy of the formal resolution that I read. I made additional remarks as to the Universities' view of medical education taking much the line that was taken by the members of the profession. We asked the Commissioner to be allowed to appear before him again after we had had a conference with the Medical Council. He was told that the other Universities would likely desire to be heard also. I cannot to-day send you a copy of what I read last week, because I want to meet our own medical committee again to get it more precisely stated. I am to be away for ten days but on my return will meet our committee and then I will let you know what we have finally decided upon so that you may have it before you when the Universities again meet the Executive of the Council.

Yours sincerely,

President.

November 9th, 1915

Dean Connell,
Faculty of Medicine,
Queen's University, Kingston.

Dear Dean Connell:

I am sending you a copy of the proposal that we are intending to lay before the Medical Council. It has seemed to us, however, that it would be wise to have a Conference with Queen's and London before the Council meets, and if we can come to any decision it will be so much the better when we meet the Council.

Could you be in Toronto on Friday morning, Nov. 12th, at 10 o'clock and meet in my office our representatives and any who may come from London? If we are able to get through our considerations in time and are ready to report, it is possible that the Council might meet on Saturday morning. Dr. Clarke will I think find out if they can arrange that provisionally.

Yours sincerely,

President.

DR. J. C. CONNELL
DEAN

NOV. 10. 1915.

President Falconer,
Toronto University,
Toronto.

My dear Sir,-

In reply to your letter of yesterday
I beg to say that I find it impossible to accept
your invitation to a Conference on Friday.

The Legislative Committee of the
Council met and Dr. Ryan tells me discussed
sympathetically the various matters under consideration.
They asked Dr. King to visit the various osteopathic
and other irregular colleges in the States and to make
a personal investigation. He is probably doing this
now. It seems to me our Conference may be postponed
till the Council Committee is called together again
and then we may all meet as we did before. I can think
of no advantage to come from a conference limited to the
university representatives,- or if it be desirable that
we should meet separately it will be more practical at
a time when a conference with the Council may follow at
once.

We are finding our college work very heavy
this year and the trip to Toronto takes at least the
entire day.

Yours sincerely,

J. C. Connell
